

WL connected fleet

Engage your fleet customers through a unique white label, commercial vehicles, telematics platform

Fleet telematics is evolving and moving toward an open Transport and Logistics ecosystem. It requires more open solutions, more real-time interactions and more mobility and analytics services. In the transport business, fleet owners are managing mixed fleets for different activities. The aggregation of all of their fleets through a centralized view is then of paramount importance. Since each fleet owner can have different needs depending on the type and lifecycle of vehicles, it's essential to offer them different commercial packages.

Worldline

Differentiating in the market with a core product coupled with telematics, mobile and data analytics

The Worldline Connected Fleet solution provides customers and partners a state of the art IoT and big data solution highly specialised on fleet management. Fleet managers using the Worldline solution, are benefiting from a broad set of tools to **improve performance** and quality, while **reducing the total cost of ownership** and operations at the same time.

Providing a rich set of services influencing the TCO of the fleet and the business operations

Transforming data into business results

Optional data analytics can be integrated with the Worldline Analytics Platform which is based on a modern, cutting-edge software and hardware basis and enables the implementation of the data analysis and processing needs of our customers, with full support from our team of business and technical experts. Regular or on-demand descriptive, predictive analytics and driver scoring analytics can be easily performed.

The future of your fleet management (Trucks / Trailers / Cars)

Worldline is contributing to the success of partnered industry leaders, such as Michelin Solutions, Continental and Here.

With our pay per use and pay as you drive business models, we look for fair partnerships with low initial investment costs for your business.

“EFFITRAILER™ improves haulage firm’s operating margins while strengthening the safety of their loads and enhancing delivery reliability. Thanks to Worldline platform’s modularity and operational capacity, we rely on Worldline to develop innovative offers and to roll them out throughout Europe”

Philippe Miret, Michelin® Solutions CEO

Cybersecurity and Data Protection are more important than ever before

The more IoT will expand within organizations the more it will deserve proper management, especially from a security perspective.

As a payment processor, Worldline is used to providing IT services with the highest security standards. The same payment security expertise is also being used and implemented throughout all of our IoT products. As a platform provider for vehicle and fleet telematics, Worldline understands that information is one of your most valuable assets and so provides our partners with cutting edge technology, while at the same time ensuring the highest level of cybersecurity and data protection with regulation compliant solutions.
